

THE CLAIM

What we claim is-

Claim 1

- A wide Steel Band of a light gauge produced in a continuous roll of
- 5 convenient length and weight, manufactured to a corrosion resistant specification, when used as a primary fencing medium of high visibility and strength with the option to apply a colour finish to both sides.

Claim 2

- A Stanchion Post fixed to or integrated with an in ground post or batten with
- 10 the Steel Band as claimed in Claim 1 mounted horizontally into the slots provided for in the Stanchion Post with tabs turned over and nailed down to establish a multi-band fence of precise dimensions.

Claim 3

- An End Clamp which, when attached to the Steel Band as claimed in Claim 1
- 15 securely fastens the Steel Band to the starting and finishing posts of the fence and locates the Band into the Stanchion post as claimed in Claim 2.

Claim 4

- A Central Tensioner which, when attached to the Steel Band as claimed in Claim 1 at the centre point of the fence or where required, enables the Steel
- 20 Band to be tensioned against the End Clamps as claimed in Claim 3 and securely locates the Steel Band into the designated slots on the Stanchion

Post as claimed in Claim 2.

Claim 5

A Joiner for joining the Steel Bands as Claimed in Claim 1 so as to provide
a continuous Band for uninterrupted installation into the Stanchion Posts as
5 claimed in Claim 2, connecting to the Central Tensioner as claimed in Claim
4 or the End Clamp as claimed in Claim 3.
